2011 IEEE International Symposium on Precision Clock Synchronization for Measurement, Control, and Communication

Plug-Fest September 12 – 13, 2011
Symposium September 14 – 16, 2011
Technische Universität München
Munich, Germany

Request for Promotional Partners:

ISPCS invites all organizations interested in precision clock synchronization and IEEE 1588 to support ISPCS as a promotional partner. There are three levels of partnership to consider:

1. Gold: Requires a contribution of \$4000 USD. All silver level benefits. In addition gold level partners will receive 10 complimentary copies of the conference CD and may place an advertising brochure and optionally a gift in the 'gift bag' provided to all attendees. If the partner wishes to include an attendee gift in addition to or in lieu of the brochure, it should be of nominal cost. Partners must notify the committee of their intention and the nature of the gift and or brochure no later than August 1 so that we can avoid duplication with ISPCS provided gifts.
2. Silver: Requires a contribution of \$2000 USD. All bronze level benefits. In addition silver level partners may participate in the exhibit program outlined below.
3. Bronze: Requires a contribution of \$1000 USD. The logo of bronze level partners will appear on the ISPCS web site and in the ISPCS program. In addition partner logos will appear on signage posted at the entrances to the conference venues.

Gold and silver partners may exhibit products either incorporating clock synchronization techniques such as IEEE 1588 or useful in manufacturing or operating clock synchronization components and systems using IEEE 1588. In keeping with the informal atmosphere of past conferences, the gold and silver partner's exhibits should be confined to a single ISPCS-provided 2x1 meter table-top. The partner may in addition provide an easel or a simple backdrop to display posters and similar material. Backdrops and easels must be contained within a width not exceeding 3 meters. Partner provided skirts for the table are permitted. However display cases, special furniture, backdrops with shelves, backdrop mounted video screens, etc are not permitted in keeping with the informal nature of this conference. If you have specific questions as to whether a display item is acceptable please contact the ISPCS committee. Power will be limited to a single extension cord from a wall socket unless other arrangements are made with the committee beforehand.

The partner's exhibit event will be held on Wednesday, September 14 in conjunction with a partner hosted reception open to all conference participants and their spouses. The scale of the partner reception will depend on the total partner contributions. Partners should retain their table-top exhibit setup during the conference on Thursday to allow participants additional time to view and discuss the exhibits with the partner.

There will be a session during the normal conference program during which each gold and silver partner will have an opportunity to give a 5 minute presentation and may reference 1 or 2 PowerPoint slides.

Please forward this letter to the person responsible for such a partnership. The response should be sent to ispcs-sponsoring@fiss-oeaw.at prior to May 2, 2011 if your company is interested in partnering and exhibiting at ISPCS-2011.
